

# COMMAND CASE

---

AN END-TO-END MOBILE COMMAND AND CONTROL SYSTEM IN A CASE

- Establish an Operations Room anytime, anywhere
- Real-time situational awareness for connecting operational teams
- Modular addition of extra components including trackers and drones
- Cases completely configurable to end-user requirements

# AIRBOX COMMAND CASE

The concept behind the Command Case is a complete command and control network in a portable case, ready to be deployed at a moment's notice.

Incorporating the MOSAIC tactical command system, the Command Case provides your organisation with a complete turn-key, flexible C2 capability designed to deliver clarity in challenging operational environments.

Ruggedised and configurable for a wide range of mission types, Command Case options include tablets, phones, wearables, drones, trackers, projectors, power supplies, communications systems and back-end hardware support.

Cases are delivered 'mission-ready' for rapid rollout anywhere globally.

## AIRBOX MOSAIC OVERVIEW

**MOSAIC is a tactical command system that enhances operational speed, accuracy and safety across teams by delivering cutting-edge situational awareness to all connected users.**

- Access aerial photography and mapping for air, land and sea.
- Secure messaging and document transfer between all team members.
- Control and integrate drones and other 3rd party hardware.
- Full suite of collaborative map tools including overlays, routing and geo-fencing.

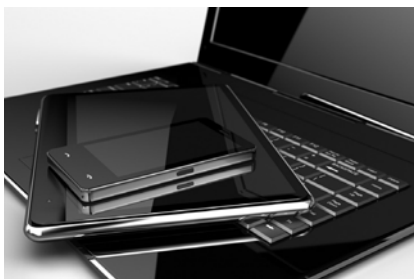

- Track blue and red forces.
- Create, store and share intelligence in real time.
- Share and annotate videos and photographs.
- Operationally proven by military, law enforcement, search and rescue and emergency services around the world.

## AIRBOX COMMAND CASE AT A GLANCE

Mission-ready, multi role: Command Cases are delivered with all necessary hardware and software installed and tailored to the users' need. They can be delivered with a comprehensive training package that introduces users to the complete MOSAIC functionality.

- **Fully user configurable**  
Integrate mapping, data feeds, networks and tracking devices.
- **Wide variety of applications**  
Command Cases suit training and operational roles for mounted or dismounted ground, air and maritime use.
- **Work together seamlessly**  
Fully interoperable quick-forming networks enabling multi-agency collaboration during all mission planning and execution phases.
- **Cost effective**  
Easily procured and rapidly delivered at a fixed price.
- **Secure & safe**  
Hosted on secure servers, data is secured with end-to-end AES 256 encryption, conforming to CJIS Security Policy, US standard FIPS 140 and CESG Security Guidelines.
- **Platform agnostic**  
MOSAIC runs on Apple, Android and Windows Operating Systems.  
  
Users can augment Command Case with their own existing hardware.

## THE AIRBOX COMMAND CASE OFFERING

- Out of the box deployability.
- Ruggedised and mission-ready.
- Easy to ship and fits easily into most vehicles, small aircraft and vessels.
- Cases can be delivered fully customised.
- Multi-platform – choose from iOS, Android or Windows hardware.
- Drone and ROV integration.
- Communicates via 2G/3G/4G, Satcom, WiFi, Tetra and Microwave.
- Tablets, smartphones, wearables and trackers.
- Land, sea and air interoperability.
- Urban and rural environments
