Product Owner

About Airbox Systems

Airbox Systems has a clear mission to help save lives and support the decision making of the emergency services and the military using software. We are driven by passion and we are made great by people who share our enthusiasm for trying to make the world a better place. Our team includes individuals from military, aviation and law enforcement backgrounds, who bring to the development of our solutions first hand insights of frontline operations, in the air and on the ground.

We have developed a suite of situational awareness tools across web, desktop, and mobile applications, using the latest technologies. These are designed for planning, execution and after action review, and are trusted by Law Enforcement, Military, Special Forces, Search & Rescue, Fire and Medical Emergency Services around the world.

Due to continued growth and new commercial contracts, we are now looking to expand our development team with a Product Owner.

Main Duties & Responsibilities

As the Product Owner you will work under the Product Manger alongside 2 other Product Owners, interacting with Engineering, Sales, and Customer Success teams in order to develop and execute the company's overall product strategy. As our team has recently grown, we are now in the position to offer a training opportunity to a Junior Product Owner, or someone wishing to move across from a different function. Long term in the role, your responsibilities will include:

- Managing the product backlog, breaking down EPICsinto user stories
- Writing clearly defined user stories for new product features, issues and future enhancements
- Run and set Sprint goals
- Working alongside the Product Manager, support plan releases and upgrades.
- Working within scrum team on estimation.
- Complete backlog grooming, follow progress of work and raise production issues during sprints through to solution.
- Acceptance testing of new features
- Serve as a product expert, product evangelist and the voice of the customer
- Define and measure the impact of new features being considered for inclusion in a product release
- Work with Product Manager and focus groups to identify product enhancements on an ad hoc basis
- Develop and maintain product documentation and guides
