

QA Tester

About Airbox Systems

Airbox Systems has a clear mission to help save lives and support the decision making of the emergency services and the military using software. We are driven by passion and we are made great by people who share our enthusiasm for trying to make the world a better place. Our team includes individuals from military, aviation and law enforcement backgrounds, who bring to the development of our solutions first hand insights of frontline operations, in the air and on the ground.

We have developed a suite of situational awareness tools across web, desktop, and mobile applications, using the latest technologies. These are designed for planning, execution and after action review, and are trusted by Law Enforcement, Military, Special Forces, Search & Rescue, Fire and Medical Emergency Services around the world.

Main Duties & Responsibilities

As the QA Tester, you will be working with a team of skilled Engineers to ensure the quality of applications trusted and loved by emergency services, police and military in applications such as search and rescue and counter terrorism. Long term in the role, your responsibilities will include:

- Testing Development team code and products, documenting issues into a database and assigning appropriately to the development team, seeing through to resolution.
- Producing high quality bug reports covering description, accurate reproduction steps and severity.
- Test different phases of our software ensuring that it is release ready, filing detailed bugs as required
- Work with product managers on testing new features and flows being released
- Writing and executing test plans
- Executing new and regression tests
- Reproducing existing bugs
- Work with product managers to ensure new features are tested
- Maintain good rapport with Developers to stay on top of any incoming changes that could affect features

Communication

- Communicates comfortably with internal stakeholders and immediate team.
- Able to business partner with internal stakeholders and build relationships accordingly
- Develops long term and robust relationships both internally and externally.

Behaviors and Team Work

- Openly shares views in a truthful and constructive way
- Actively listens to other people and uses their experience to understand, learn and grow.
- Takes ownership for seeing things through.
- Understands how their contributions affect the team, department and company
- Builds and maintains good relationships with their team department and across the company

Key Requirements

Essential

- Previous experience as a QA Engineer, both with manual and automation experience
- Strong knowledge of software QA methodologies, tools and processes
- Experience and a strong understanding of the testing position within SCRUM/Agile continuous delivery environments.
- Experience testing multi-platform software and servers: Android, iOS, PC with consideration of the convention of each platform.
- A methodical and analytical mindset
- Excellent organisation skills and attention to detail
- Articulate with excellent verbal and written communication skills
- Builds and maintains good relationships with their team department and across the company
- Ability to work without supervision and under pressure

Desirable

- Experience with mobile/web development
- Experience with Agile tools including Confluence/Jira ISTQB-BCS
- Foundation Certificate or above

Airbox Systems is an equal opportunity employer. We are committed to building a team which represents a variety of backgrounds, perspective and skills.
